(54) PAPER MEDIA SYSTEM

(57) Abstract:

PURPOSE: To provide a paper media system in which a bar code is used and an accuracy is improved at the time of restoring bar code information from a bar code.

CONSTITUTION: This system restores an original image from the bar code having a first bar code in which images are encoded and a second bar code in which the condition of a reading means for accurately reading the first bar code is encoded. The system has a reading means 2 for reading the bar code, a discrimination means for discriminating whether the encoding information of the first bar code can be accurately re-

stored by the reading means 2 or not based on the second bar code read by the reading means 2 and a restoration means for restoring the original image information from the first bar code when the discrimination means judges that the information can accurately be restored and not restoring the original image information from the first bar code when the discrimination means judges that the information can not accurately be restored.
